DETAILED ACTION

1. Applicant's election dated 5/20/03 has been received in application serial number 10/062,794. Claims 5-10, 13-44 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species. Election was made **without** traverse in Paper No. 9.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Shanley 6,562,065. Shanley discloses the invention as claimed noting figure 11 comprising: A medical device (which is a stent 180) with a plurality of struts (88) and a plurality of non-structural elements integral with the struts (182), wherein the struts and the non-structural elements comprise the biologically active material. (See col. 14, lines 39-57).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3738

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shanley.

Shanley has been disclosed above with regards to claims 1 and 12 however Shanley does not specify the term “hoops” for the shape of the non-structural elements. It is obvious to one having ordinary skill in the art that the “holes” (182) of Shanley can equate to “hoops” because both have a circular shape.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shanley in view of Harish et al. 6,506,437. While Shanley does state the use of biologically active material, Shanley does not specify the drugs. Harish et al. teaches the use of paclitaxel, dexamethasone, and actinomycin (see col. 6, lines 64 and col. 7, lines 5 and 19). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the drugs of Harish et al. into the stent of Shanley because they could treat individual dysfunction at the tissue in the vessel site depending upon the individual patients needs.

Allowable Subject Matter

7. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3738

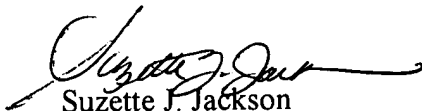

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stenzel 6,540,777; Wright et al 6,273,913; Taylor et al. 6,083,257; Myler et al. 5,643,309 ; Fearnot et al. 5,609, 629 all show related material..
